

**STATEMENT UNDER ARTICLE 19**

The Examiner argues that the subject matter of claims 1, 4-12, 14, and 15 lacks novelty and inventive step over D1 and D2.

The instant claims are novel over D1 because D1 does not teach or suggest a silane having two groups each independently selected from the group consisting of alkoxy, acetoxy, oxime, and hydroxy groups. Therefore, D1 fails to teach or suggest component b) of this invention.

The instant claims are novel over D2 because D2 does not teach or suggest an unsaturated compound selected from the group of an unsaturated short chain siloxane, an unsaturated cyclic siloxane, an unsaturated fatty acid, an unsaturated fatty alcohol and an unsaturated fatty acid ester. Although D2 discloses a silicone-organic copolymer (which has both silicone and organic units in the polymer chain); this silicone-organic copolymer is not an unsaturated short chain siloxane. Therefore, D2 fails to teach or suggest component e) of this invention.

The claims have inventive step over D1 and D2 because neither D1 nor D2 teaches or suggests any cured product having surface modification, or composition for making such a product.
